

Mouldshop Quality Inspector

A vacancy has arisen within the moulding department for a Mouldshop Quality Inspector, reporting directly to the Shift Team Leader and joining one of our 3 strong mouldshop teams to work our 24/5 rotating shift system.

The primary purpose of this role is to ensure production mouldings meet dimensional and visual requirements and that related data is recorded in hard copy and electronically. It is a key role in ensuring customer satisfaction and as such will involve problem solving and continuous improvement activities.

Main duties include:

- Dimension inspection of production mouldings in accordance with quality procedures using hand-held inspection equipment, Dai-test heads, PK gauges, visual inspection equipment such as the Mondo and shadowgraph and the CMM
- Visual inspection of production mouldings
- Recording of quality checks data to hard copy DSC sheets and directly in to PC based SPC systems
- Maintaining product traceability using the batch card system
- Reporting of quality issues including raising concern reports if required and contribution to problem solving activities
- Support of and participation in CI initiatives
- Ensure all quality assurance procedures are adhered to
- General Mouldshop duties as required

Experience:

- Use of basic measuring equipment micrometres Vernier's etc.
- Completing SPC charts and data
- Conversant with engineering drawings
- Computer literate (EXCEL in particular)
- Knowledge of CMM, Mondo, Shadowgraph and electronic gauges preferable
